

BAD BLOOD: THE TUSKEGEE SYPHILIS EXPERIMENT

From 1932 to 1972, the United States Public Health Service conducted a non-therapeutic experiment involving over 400 black male sharecroppers infected with syphilis. The Tuskegee Study had nothing to do with treatment. Its purpose was to trace the spontaneous evolution of the disease in order to learn...

Reader's Opinions

Educational but not overly academic. It definitely helps you understand how this could have happened, how people could justify participation and how to never let this kind of outrageousness ever happen again. Much more nuanced than expected.

I'm pretty excited about this - this book is required reading for my Pharmacy law and ethics course, so I think it's going to be an eye opener...and it'll be nice to get away from so many of the scientific journals I have to read all the time!! I'm never going to finish this book, so I'm just going to be honest with myself right now,...
